

Expansion Bays

Travco manufactures several modules for Expansion Bays, that you will typically find in their wide array of temporary outposts and recreational ships.

| Expansion Bay | PCU | Cost (in BP) |
|---------------|-----|--------------|
| Garage, Small | 5 | 4 |
| Garage, Large | 8 | 7 |
| Medical Suite | 6 | 9 |

Garage

The Garage is Travco's line of storage and deployment bays for family-size ground vehicles, to help enable you to more easily get around your new environment. Each Garage unit has room for 1 or 2 ground vehicles (Small and Large, respectively), and also provides plenty of workspace for repairing and crafting most technological items that you'll need on your adventures.

Medical Suite

The Medical Suite is a compact module that is able to serve multiple roles. It functions as a Medical Lab for up to two patients, a General Science Lab, and a Synthesis Bay, but only takes up a single expansion bay in your ship. Travco Medical Suites also come standard with facilities to support a medic drone at no additional charge.
